SITE INFORMATION:

Lot 8, Block 51, River Oaks Section 3, City of Houston, Harris County, Texas. The site includes a historic two-story, brick and wood veneer residence.

TYPE OF APPROVAL REQUESTED: Landmark Designation

HISTORY AND SIGNIFICANCE SUMMARY:

The Miller-Tunks House at 2117 Chilton Road was constructed in 1933 for Jesse G. Miller. However, the home is associated with a notable Houston judge and attorney, Bert H. Tunks. Judge Tunks is perhaps best known as one of the founding partners of Bracewell & Tunks which survives today as Bracewell & Giuliani. The home was designed by the prolific Houston architects, Hiram Salisbury and George McHale. The body of work created by these architects is substantial and includes many of the iconic homes in River Oaks and Southampton, as well as St. Johns School and the St. John's Chapel, designed in association with Mackie and Kamrath Architects. The home at 2117 Chilton Road is designed in the Tudor style, which is enhanced by the use of undulating bricks and half-timbering on the exterior. To date, there are no other known examples of Salisbury and McHale designs that possess the undulating brick pattern. The house qualifies for Landmark Designation under Criteria 1, 3, 4, 5, and 6.

HISTORY AND SIGNIFICANCE:

Notable Houston architects, Hiram A. Salisbury and T. G. McHale, designed the house at 2117 Chilton Road in 1934. The first owners were Jesse G. and Marcelle Miller. Jesse Miller was in the real estate business. Miller's long time office was located in the Citizens Bank building from 1936 until the 1950s. Jesse and Marcelle Miller owned the home until 1974 when it was sold.

In 1974, the house at 2117 Chilton Road was purchased by Judge Bert H. Tunks and his wife Annelle. The Tunks lived there from 1974 until Judge Tunks' death in 1988. Annelle Tunks kept the home until 1999 when it was sold to a new owner who owned the home for a short while before selling to the current owners, Randall and Ruth Riepe.

Judge Bert H. Tunks (1911-1988) was born in Durant, Oklahoma. He attended Oklahoma State University and graduated from the University of Texas Law School in 1940. His academic honors include membership in the Order of the Coif and Law Review. On November 1, 1945, Tunks joined with J. S. Bracewell and his two sons, Searcy and Fentress, to open the law firm, Bracewell & Tunks. The firm continues today as Bracewell & Giuliani and maintains a strong presence in Houston. While practicing with Bracewell, Tunks represented a variety of clients including the Houston Independent School District.

In 1957, after practicing law for 17 years, Tunks was appointed to the 113th Civil District Court, beginning a long career as a judge. From 1967 until his retirement in 1975, he served as Chief Justice of the 14th Court of Civil Appeals. During his career as a judge, Judge Tunks was ranked twice (1973 and 1975) as the most outstanding judge in Harris County by the Houston Bar Association. Interestingly, he was appointed in 1977 after his retirement to preside over the disbarment lawsuit against Texas Supreme Court Justice Don Yarbrough.

Judge Tunks maintained a close relationship with the South Texas College of Law, serving as Adjunct Professor of Corporations for about 20 years. He also served as a member of the school's Board of Trustees. According to his obituary, "One of Judge Tunks' greatest joys was his association with the many potential young lawyers he came in contact with during his involvement with the law school."

Judge Tunks was active in the legal community; he was a member of the Houston Bar Association, the State Bar of Texas, the American Judicature Society, the American Bar Association, and was a charter member of the Texas Bar Foundation. When he passed away in 1988, his pallbearers included a diverse group: Joe Jamail, Dahr Jamail, Searcy Bracewell, Fentress Bracewell, Judge Curtis Brown, Judge Sam Johnson and others.

According to architectural historian Stephen Fox, Hiram A. Salisbury (1892-1973), the architect for the Judge Tunks Home, was born in Omaha, Nebraska. Salisbury studied architecture under a fellowship from the American Institute of Architects and later graduated from the School of Architecture at New York's Columbia University (1913-1914). He worked as a draftsman for Thomas R. Kimball from 1910-1923 and George B. Prinz from 1923-1926. Salisbury established his own architectural firm in Houston in 1926, and he is first listed in the 1927 Houston City Directory with his office in the Post-Dispatch (subsequently Shell) Building where he had his office until 1937.

Beginning in 1928, according to Fox, Salisbury collaborated on many projects with fellow architect, T. George McHale. Their projects included both residential, commercial, and churches. Among their more notable projects are the St. John's School located at 2401 Claremont, St. Stephens Episcopal Church located at 1805 W. Alabama, as well as many of the homes located in River Oaks, Southampton and other upscale Houston neighborhoods. In 1938-39, Hiram A. Salisbury and T. George McHale relocated their office to the River Oaks Community Center, located at 2017 W. Gray. Salisbury and McHale later moved their offices to 3501 Allen Parkway in 1945.

Per Stephen Fox, Thomas George McHale (1903-1975) was also born in Omaha, Nebraska, and attended school at the University of Notre Dame. Following the receipt of his architectural degree, McHale became a draftsman for John Latenzer & Sons, where he worked from 1919 until 1923. In 1924 he worked for James A. Allen and Leo A. Daly. Interestingly it is speculated that Leo Daly is the great uncle of Ruth Daly Riepe, one of the current owners of the home. In 1925, he began working for George B. Prinz where he joined Salisbury there. They both left that firm to form their own firm in 1927. The wife of T. George McHale was Inez P. McHale, who was a celebrated Houston interior decorator. They lived first at 1106 Palm Avenue and then moved to No. 2 Courtlandt Place.

Beginning in 1930, Hiram A. Salisbury and his wife lived at 3412 Yupon, between Hawthorne and Harold. By 1953, Hiram A. Salisbury and his wife were living at 610 Saddlewood Lane. Salisbury continued his practice in Houston until approximately 1962, when he retired to Medford, Oregon. He had served as the President of The American Institute of Architects, Houston Chapter in 1954.

A list of identified works of Salisbury (HAS) in association with McHale (TGMcH) and others, which was researched and provided by Stephen Fox, includes: Masonic Temple, 118 N. 11th St., Mc Allen TX, 1926; Southampton Home Sensible, 2218 Dunstan Rd, 1927; W. Chilton Road is host to a significant number of homes designed by noted Houston architects. Among these are one example designed by John Staub, two homes designed by Birdsall Briscoe, and at least one other Hiram Salisbury design. In recent years the area has been the target of new development. The historic homes of Chilton road and nearby, which average 3,000 square feet, are being replaced by 5,000 to 6,000 square foot homes.

ARCHITECTURAL DESCRIPTION AND RESTORATION HISTORY:

The home at 2117 Chilton Road is a two-story brick veneered home built in 1933. The house is designed in the Tudor style, which was very popular at the time. A similar example of this style in River Oaks is the Hal and Iley Nunn Davis House at 1915 Bellmeade Drive (Protected Landmark 2006) designed by Charles Oliver in 1929. The Tudor style is enhanced by the use of undulating bricks and half-timbering on the exterior. To date, there are no other known examples of Salisbury and McHale designs that possess the undulating brick pattern.

The home utilizes multiple intersecting gables in the roofline, which contribute to the Tudor influence of the home. Windows used throughout the home are of a six-pane wood sash casement window type with the exception of a prominent leaded glass window which is centrally located on the second story of the primary façade.

The Riepes purchased the home located at 2117 Chilton Road in 2002. At this time, the home had been gutted by the previous owner who had begun the initial phases of a renovation. The Riepes rehabilitated the home and expanded the existing kitchen, added a family room, and extensively re-landscaped. The new addition to the home was subtly executed by closely matching the original undulating brick pattern. The home retains many of its original interior elements like original exposed beams in the formal living room and two leaded glass windows, and thick plaster walls.

The façade of the home has undergone some alterations from its 1933 appearance that are reversible and do not impact the significance. After 1935, as evidenced on Sanborn Fire Insurance maps, modifications were made to the main entry way, which are stylistically compatible. The original plans specified a door with half-timbering for trim. After 1935, a small gabled entry was built forward of the entry door which is open on its sides and is supported by massive wood timbers. In addition, an attached porte-cochere, which is situated approximately five feet forward from the west elevation of the main building, was enclosed on the Chilton Street side with matching brick, and three casement windows were installed like those utilized elsewhere on the house.
